

Gentlemen,
Since my purchase of the XM radio, I no longer use my FM / AM nor do I use my CD player in my vehicle. To end the broadcast of XM will be a terrible blow to the people of the US. The news of the Iraqi war broadcasted on XM was a major source of news for me. I also listen to talk shows as well as my choice of music.

If the XM radio is banned, then I wish to request a refund from you for the purchase / installation of my current XM satellite radio system. It was purchased in good faith with the intent of its use. If you the FCC had issues with said item, they should have been resolved prior to the marketing of the product.

Thank you,

LRB
